PROFESSIONAL SUMMARY

Enthusiastic Software Engineer driven by curiosity and innovation, with experience developing responsive, user centered web and mobile applications. Skilled in Python (Django), React, React Native, and full-stack development. Passionate about building scalable software solutions, writing clean and maintainable code, and collaborating with cross-functional teams to deliver impactful digital products. Committed to continuous learning and staying current with emerging technologies and industry best practices.

PROFESSIONAL EXPERIENCE

Software Engineering Apprenticeship

2025 – Present

Refractory Academy

Currently undergoing intensive software engineering training focused on full-stack development, software engineering principles, and modern web technologies.

Working on real-world projects involving mobile applications, web systems, and vendor management platforms.

- Building responsive web and mobile applications using React and React Native.
- Developing backend systems with Django and PostgreSQL.
- Collaborating in agile software development teams.
- Implementing authentication, authorization, and API integrations.
- Applying best practices in software architecture and version control.

EDUCATION

Certificate in Software Engineering

10/2025 – 05/2026

Refractory Academy

Relevant coursework includes software engineering principles, full-stack web development, mobile application development, database management, version control, API development, and collaborative software engineering practices.

Uganda Advanced Certificate of Education (UACE)

01/2023 – 11/2024

St Mary Magdalene Girls Secondary School

Uganda Certificate of Education (UCE)

01/2019 – 10/2022

St Mary Magdalene Girls Secondary School

TECHNICAL SKILLS

Backend

- Python(Django)
- Django REST Framework
- Node.js
- PostgreSQL
- MySQL
- SQLite
- JWT
- Auth
- REST APIs

Frontend & Mobile

- React.js
- React Native
- Javascript
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap
- Responsive Web Design

Tools & Practices

- Git & Github
- Docker
- CI/CD
- Postman
- Agile Methodology
- Render
- Digital Ocean
- Visily
- Trello
- Figma

Soft Skills

- Problem Solving
- Team Collaboration
- Leadership
- Critical Thinking
- Communication

PROJECTS

E-Commerce Mobile and Web Application

11/2025 – 06/2026

Technologies: React Native, React.js, Python Django, JWT, Postgres, Git, CI/CD, Payment Gateway APIs, Docker, Agile methodology, Digital Ocean

- Developed a multi-vendor marketplace platform supporting buyers, vendors, and administrators.
- Implemented role-based access control, vendor onboarding, and user authentication.
- Built product listings, shopping cart, checkout, and order management features.
- Integrated secure payment processing and transaction confirmation workflows.
- Developed vendor and admin dashboards for sales, listings, and platform management.

Wood and Furniture Management System

07/2025 – 10/2025

Technologies: Python, SQLite, JWT Authentication, Git

- Designed and developed a full-stack inventory and sales management system for a wood and furniture business.
- Implemented stock management features for tracking timber, poles, furniture products, suppliers, pricing, and stock updates.
- Developed sales management functionality to record customer purchases, payment methods, transportation charges, and sales agents.
- Built automated stock and sales reporting modules to support managerial decision-making.
- Integrated secure authentication and role-based access control for managers and attendants.
- Improved operational efficiency by digitizing inventory, sales, and reporting processes.
